Multiple Disease Prediction System | *Python, Streamlit, Machine Learning*

Completed

- Developed an interactive, 3-page Streamlit medical web app predicting Diabetes, Heart Disease, and Parkinson's.
- Integrated 3 trained ML prediction models with structured data preprocessing for real-time medical decision support.
- GitHub Link:** github.com/PB07BOHRA

Parking Reservation System | *Java, File I/O, OOP*

Completed

- Architected a terminal reservation system utilizing 5+ custom classes for real-time vehicle booking and datetime tracking.
- Simulated database management by implementing file I/O operations with .txt files, processing 100% accurate user records.
